About NeuroBlade

NeuroBlade is reinventing infrastructure for data analytics by setting a new standard for query processing speed and scale. Founded in 2018 and led by veterans of the systems, storage, and data analytics industries, NeuroBlade is rethinking processor design with its proven Compute Made For Analytics approach, built to maximize throughput at petabyte-scale so that queries can run multiple orders of magnitude faster. NeuroBlade is headquartered in Tel Aviv, Israel, and Palo Alto, California, with operations in Taipei, Taiwan, and New York City. To learn more, visit www.neuroblade.com.
